SUMMARY

Software Engineer specializing in React application development with a strong grasp of UI/UX design principles, CSS and CSS Preprocessors, and REST API integration. Proven expertise in creating responsive and visually appealing web applications. Committed to staying current with the latest front-end technologies and best practices.

EDUCATION

ECPI University

Bachelor of Science in Computer Science - Software Development

EXPERIENCE

Product Engineer, Decisions

February 2023 - October 2023

Developed React-based applications, including an internal App Store and a custom Project Management platform, optimizing project management.

Integrated various JavaScript controls into a .NET platform to leverage external APIs such as ArcGIS maps and Moneris Payment platform.

Enhanced process automation by integrating the OpenAI API into the platform.

CEO/Developer (Freelancer), Tidal Sites

April 2019 - Current

Designed and constructed custom websites using Vanilla JS or ReactJS, delivering tailored solutions.

Created logos, UI/UX designs, and graphic elements for clients.

Orchestrated AWS Infrastructure for hosting and DNS management and implemented GitHub Actions for CI/CD automation.

Full-Stack Software Developer, NUBorders

January 2022 - August 2022

Managed UI/UX standards, conducted code reviews, maintained ticket tracking, and documented processes.

Streamlined local development by containerizing AWS microservices using Docker.

Ensured compliance with 508 standards for a Proof of Concept application.

Full-Stack Software Developer, U.S. State Dept. (contractor)

September 2019 - September 2021

Spearheaded the transformation of an outdated PHP application into a modern React app, supporting Pipeline and Infrastructure engineers.

Automated the building of templated Wordpress applications in Azure through CI/CD pipelines and Infrastructure as Code.

Served as Subject Matter Expert for three JavaScript-based applications, enhancing features and UI/UX design for a superior customer experience.

Engineered an AWS to Azure cloud migration for multiple applications, encompassing software modifications, DB upgrades, and infrastructure provisioning.

Information Systems Technician, U.S. Navy

November 2009 - September 2017

As Network Operations Center Lead Administrator, maintained IP services and delivered Tier 1 support for Fleet customers.

Drafted a Personnel Qualification Standard as a Subject Matter Expert for the Mobile Communications Platform to enhance system training.
